

Webinar Wednesdays

2021 Schedule

Webinar Wednesdays are back! We are pleased to offer our courses online once again. We will repeat some of our popular webinars for those that missed them the first time around, and we've also got new courses in the works. This time around we've invited industry partners to present as well, so we have even more to offer.

We invite architects, designers, technologists, masons and anyone interested in learning about Arriscraft and our partners. Webinar Wednesdays will allow access to our presentations on a computer, from anywhere in North America. Our courses are AIA accredited, and can also be used towards OAA, ARIDO and ASID learning credits.

January 13th | Stone Designs

AIA Program Number: SD
LU Hours 1.00 / HSW

<https://attendee.gotowebinar.com/register/3562839198762502923>

In this presentation we will discuss the formation of natural stone and compare that with the natural process technology of manufacturing Calcium Silicate Stone Units. Architectural detailing for stone masonry veneers promoting moisture management principles and considerations for control of movement in masonry walls is covered. A variety of design styles incorporating stone masonry materials are highlighted.

February 10th | Proper Masonry Detailing (NEW)

AIA Program Number: PMD3
LU Hours 2.00 / HSW

<https://attendee.gotowebinar.com/register/7997561019722685195>

In this presentation, we discuss the design and construction factors that impact the long-term performance of masonry veneer wall assemblies. We will also delve into the Energy Codes and how full-bed masonry wall assemblies meet or exceed the requirements for energy efficient building design. We will dive into architectural detailing for masonry veneers that promote moisture management principles as well as considerations for the proper control of movement in masonry walls.

March 10th | Changing Landscape of Thin Adhered Masonry Veneers

AIA Program Number: CLAVI2
LU Hours 1.00 / HSW

<https://attendee.gotowebinar.com/register/7296210040155090955>

We will discuss Thin Adhered Masonry Veneer and the wide variety of potential uses for them including (NEW) and renovation applications. We will cover how to meet the requirements of the Energy Code when utilizing these assemblies.

April 7th | Pushing The Envelope – Continuous Insulation Solutions for Thin Adhered Masonry Veneers

AIA Program Number: PTEICB
LU Hours 1.00 / HSW

<https://attendee.gotowebinar.com/register/2853967559661033739>

We will discuss and explore Engineered and Tested Continuous Insulation (CI) solutions for thin adhered masonry veneers to meet the requirements of the Energy Code anywhere in North America.

May 5th | Protected Membrane Roofing (NEW) (Presented by T-Clear)

AIA Program Number: T037CES02
LU Hours 1.00 / HSW

<https://attendee.gotowebinar.com/register/7354463265706338827>

Provides a comparison of the functional and physical features of PMR systems to conventional low-slope roofing applications. Includes a discussion about the ASCE 7 standard and its impact on wind uplift design and how weather events such as hail impact roof design.

June 2nd | Look to the Interior - Thin Masonry for Internal Beauty and Design (NEW)

AIA Program Number: LITMIB
LU Hours 1.00 / HSW

<https://attendee.gotowebinar.com/register/180873373119029771>

This program will discuss the many ways thin masonry can bring a sense of warmth and dynamic aesthetics to any interior. We'll explore how thin masonry can range from classic and traditional to sleek, contemporary and modern. While many people think of masonry as an intriguing and thought-provoking exterior cladding material, thin masonry can continue that theme to the interior. With so many different options for thin masonry including Thin Brick, Thin Natural Stone, and Thin Calcium Silicate, the world is your oyster when it comes to creating beautiful and stunning interiors.

After registering, you will receive a confirmation email that will contain information about how to join the webinar.

January 27th | The Poetry of Walls – Unique Brick Detailing (NEW)

AIA Program Number: GSB34
LU Hours 1.00 / HSW

<https://attendee.gotowebinar.com/register/5687650916997803019>

This program will discuss brick manufacturing, sustainability and unique brick detailing. Brick allows for an almost endless array of creativity using sizes, colors, patterns, etc. to design walls. Also discussed will be how brick fit into sustainable building designs and how to detail these unique cladding designs incorporating brick.

February 24th | “Thermally Broken” Shelf Angles (NEW) (Presented by Fero Corp)

AIA Program Number: OOUOA1
LU Hours 1.00 / HSW

<https://attendee.gotowebinar.com/register/4536520516832660491>

Requirements for continuous insulation in above-grade wall assemblies are becoming more common to meet energy codes and energy efficiency programs that continue to shift the industry toward more stringent thermal performance standards.

This presentation will focus on thermally efficient methods for masonry cladding supports.

March 24th | Thin-Brick – An Exploration of Unlimited Options and Potential (NEW)

AIA Program Number: GSB-39
LU Hours 1.00 / HSW

<https://attendee.gotowebinar.com/register/973924721954748171>

This program will discuss thin brick manufacturing, sustainability and unique brick detailing when thin brick is employed in building design. Discussions will be on how brick are formed which allow for an almost endless array of creativity using sizes, colors, patterns, articulation, etc. to design walls. The many ways in which thin brick can be installed will also be discussed including thin brick embedded into precast concrete panels, adhered thin brick veneers, floors, ceiling barrel vaults and other unique features.

April 21st | Proper Thin-Adhered Masonry Veneer Detailing for the Modern Age and Energy Codes (NEW)

AIA Program Number: PTAMD
LU Hours 2.00 / HSW

<https://attendee.gotowebinar.com/register/6932004510035718923>

We will expand on previously presented detailing concepts and look at how to properly detail exterior wall assemblies with continuously insulated thin adhered masonry veneers that meet the requirements of the Energy Code.

In this presentation we will consider concepts like moisture movement (wind driven, capillary, condensation) and related details, such as “At Grade” details, Window sills, heads and jambs, deflection joints, movement joints, and parapet details as well as some other special details.

May 19th | Just Hanging Out on the Wall – Masonry Rainscreens

AIA Program Number: JHMR2
LU Hours 1.00 / HSW

<https://attendee.gotowebinar.com/register/8345936880937075723>

To discuss Masonry Veneer Rainscreens and the wide variety of potential uses for them including (NEW) and renovation applications. This course covers how to meet the requirements of the Energy Code when utilizing these assemblies.
